

UAS Founder's Speech

It is time to make Africa United. Making United Africa States effective

In every dark hour of the poorest African people, there are continuous life change-ring calls

I am here to the greatest demonstration for basic human rights and valuable natural resources protection.

In every dark hour of the poorest African people, there are continuous life change-ring calls.

Billions of Africa people face with life challenges and difficulties. Government officials at all levels are sinking in serious corruptions. Unemployed citizens face tough problems; young people are leaving their homes for better life; farmers are being displaced from their farmlands.

Fear can be retreated with a manmade treatment. Let me assert my firm belief that there is nothing I afraid

Fear can be retreated with a manmade treatment. Let me assert my firm belief that there is nothing I afraid. Now is the time to realize the life change-rings. Now is time to bring a real life change on the poorest African people. Now is the time to provide food and shelter to the poor. There are believes that stadiums and dams are more important than foods and shelters. There are believes that Africa

forests and wild animals are more important than the farmlands and the Africa farmers. The poorest Africa people must refuse and must come to break these believes. We must refuse to accept foolish optimists who deny the dark realities of the poorest, the life challenges of billions. We must refuse to accept corruption practices; we must refuse to accept abuses of power. The people with real hearts and minds must reject fake political exercise.

I know some of you have come from areas where your people are struggling in braking rocks, building dams, and protecting dark rooted forests.

The poorest's distress comes from no failure of substance elements.

My friends, let us not allow ourselves expose our fertile lands and wash with winter and summer floods. We must not allow our natural resources exposed for strong winds. We must not allow the Africa resources go down, let us not allow ourselves sink in the rift valleys, volcano depressions areas.

My friends, let us not allow ourselves leave fire areas for generations. We must stand up to protect Africa resources and respect humanity values. We must not turn back; we must not allow the Africa people back to the slavery centuries. We must refuse to see the Africa people keep braking rocks, hills and mountains, crooked areas and making dams, rolling down floods and washing farmlands. We must educate every single African to think broadly, act wisely, to refuse wrong actives, to say no slavery, to reject foreigners' agenda. We must provide basic needs by ourselves, we must say stop aids. We must not see young Africa people leaving their homelands, we must create good opportunities to live and work at their homelands.

This is time to stand to United Africa States.

United for real action, and real change; to create good atmosphere for work, to put people to work. There is no

The poorest's distress comes from no failure of substance elements

We must educate every single African to think broadly, act wisely, to refuse wrong actives, to say no slavery, to reject foreigners' agenda. We must provide basic needs by ourselves, we must say stop aids

We understand and recognize the overbalance of the Africa population but we cannot solve by engaging on distributions

unsolvable problem if we united. But we cannot keep dividing our small states and our farm lands for unreasonable desire profits. Through employment on greatly needed projects, food security and shelter, and basic infrastructure, we can ensure the use of the citizens' land resources. We understand and recognize the overbalance of the Africa population but we cannot solve by engaging on distributions, by dreaming a better place for the best fittest future generations.

May I take this opportunity to remind some realities from the past, by focusing in the present, and keep dreaming for the future.

Centuries later, there is still no life change on the Africa poor. There are still chains of discriminations and corruptions

This is not without thankful for our forefathers. Although their efforts have been in the very tradition way, they have tried their best. During failure of development, they used to admit their failure, they used to propose ways to overcome many challenges, they used to struggle wisely. Failure was not from their own incompetence. They had visions and missions. Now is the time to advance our forefathers' efforts and attempts into the highest level. True, the corrupted present officials have fled from their high seats in the temple of our past civilization. Centuries later, there is still no life change on the Africa poor. There are still chains of discrimination and corruption, and shameful practices. Now is the time to restore the ancient truths and honest society services. Now is time to apply social values and believes more noble than mere monetary and monarchy profits.

UAS priorities on basic human needs on the present poor people, a good work atmosphere and education for children and young people

United Africa States is being built with faith and inside motivation, strong commitment and passion about real change on the present and the future. UAS priorities on basic human needs on the present poor people, a good work atmosphere and education for children and young people. We believe that if we respect each other, think one another, solve poverty together, bring significant change on the poorest first, we may have the chance to think about the future generation as well.

through standard structural strategy, workable systems and policies, through creative and innovative administration framework, change will come soon

Let United ring from the poorest home, from the territory islands. Let United ring from the snow-antarctica rockies, from all corners of the Africa landscape, from Africa neighbor borders and sideways. And when this happens, when we let we United, when we allow United ring, through standard structural strategy, workable systems and policies, through creative and innovative administration framework, change will come soon; from every state, substate, city, and subcity, life change will be able to speed up.

UAS development lies not in the mere desire of money or power; it lies in the desire of real achievements, through creativeness and innovative efforts; it lies in the moral stimulation, strong commitment and passion about real change

Let development ring from the United Africa States. UAS development lies not in the mere desire of money or power; it lies in the desire of real achievements, through creativeness and innovative efforts; it lies in the moral stimulation, strong commitment and passion about real change. UAS is being built not based on the desire of recognition of material wealth or political power positions or standards of pride of place and personal profit; and there must be an end to a conduct in fake business practices and selfish wrongdoing. Small wonder, there are fake trust people thrive on laziness, selfish performance, fake trust people that without them the world cannot live. In the field of world crisis and long term agenda, we would dedicate Africa to have its own policy and strategy; as we keep respecting the rights of others, we demand equal respect from others. We shall seek the immediate real change in all Africa States, in all the Africa people.

The existing government systems have been focused on enduring political mechanisms and exercise of power over citizens' basic needs

We invent and form modern United Africa States administration system based on the ground realities. The existing government systems have been focused on enduring political mechanisms and exercise of power over citizens' basic needs. But still this is not without acknowledging the old government systems which we have inherited and adopted. We form an administration which focuses on the citizens' basic needs, an administration system which is being built based on non-political instruments, but with a framework to speedy innovations and solve poorest's tough problems and the world's global

Through best action plans and effective innovative programs we plan, we shall address tough society problems

with the vision and mission of real change that comes from the inside of African people; with the aim to ensure at least basic human needs on the lives of the poorest in the present and real dream for the future

I do not distrust, I do not undermine, I do not see the valuable adapted practices or the essentials of democracy exercises violated, but I do build more trustful modern administration system for them.

crisis. Through best action plans and effective innovative programs we plan, we shall address tough society problems.

We face the enormous warm courage to United Africa States; with the clear consciousness of real mind seeking precious moral values; with the vision and mission of real change that comes from the inside of African people; with the aim to ensure at least basic human needs on the lives of the poorest in the present and real dream for the future. UAS is the way to recovery the good practice of the past. UAS is the immediate way, the strongest approach for real change on the poor.

We read and feel the temper of our people, and we realized that we can not merely take, but we must give as well. But without going forward, without understanding a common discipline, no plan can become effective, and no real progress can be made. And so we shall establish sound and sustainable trade market economy relations with the rest of the world, by considering various elements.

The people of Africa themselves have asked for better life directions and workable systems. I do not distrust, I do not undermine, I do not see the valuable adapted practices or the essentials of democracy exercises violated, but I do build more trustful modern administration system for them. They have made me as their instrument vision, as their hopes and wishes; and so in the faith and spirit of the gift, which was born within my soul, I take it to the highest possible level.

May God keep the Africa resources save and bless its people.

United Africa States First
